

SVETOSS+

Tailor-made Solutions for a Wide Range of Requirements in Bone Regeneration for Orthopedic, Oral-maxillofacial & Dental Procedures

Moldable Putty - Bioactive - Bioresorbable - Osteoconductive - Osteoinductive

SVETOSS+

Dear customers

We are excited to announce to our costumers the launch of our newest product, SVETOSS+. It is another cutting-edge universal bone regeneration solution, but in a putty form designed to make your bone grafting an even easier procedure and even more of a straightforward part of your high standard of care.

SVETOSS+ is based on SVETOSS innovative technology which keeps providing outstanding solutions for bone regeneration. Its Gold-Standard (autologous bone graft) performance keeps being confirmed with world-wide clinical applications including very difficult cases the Gold-Standard itself failed.

With SVETOSS+ putty, the pre-application mixture with blood which forms an easier to handle composite, is no longer needed. This, however, does not compromise the osteogenicity boost of your grafting material. SVETOSS+ putty indeed mixes ultra rapidly with blood in-situ shortly after the application and its efficacy is clinically proven to be at least as good as S-VETOSS.

SVETOSS+ is the first of its kind in North America, and we believe it gives Veterinarians a way to revolutionize their treatment of bone-related issues in their patients.

We are committed to continue supporting all your bone grafting needs with unrivalled excellence. We are confident that you would love to try SVETOSS+, and we are offering you a special promotion as one of our valued customers. For a limited time, you can get a discount on your order of SVETOSS+.

Thank you for your support, and we look forward to hearing from you regarding this new development.

Best regards,

SVETOSS+

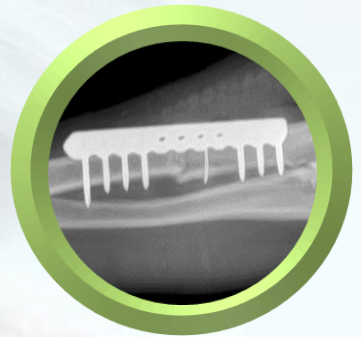

SVETOSS+ a dawn breaking moldable putty biocomposite bone graft, used in Orthopedic, maxillofacial and oral surgeries to expediently regenerate bone in situations of bone voids or gaps, loss, defects or need of bone augmentation in general.

SVETOSS+ has a proven clinical performance reminiscent of autologous bone graft. It induces and supports native bone growth and naturally resorbs away in the process, leaving behind natively regenerated bone.

We use a unique technology to manufacture our products under the highest international standards for Medical Device production and distribution (ISO 13485).

Freedom to Operate Has Never Been so Easy

Natural Efficacy

**Cutting Edge Bone Regeneration Technology
with Natural Efficacy**

SVETOSS+

Moldable injectable Biocomposite Putty

- Excellent adaptability to bone voids.
- Good integration into implant site.
- Universal bone graft (species & site wise)
- Excellent hydrophilicity.
- Active promotion of bone growth.
- Optimal balance of bioresorption and 3D-scaffolding.
- Gold-Standard clinical performance.

Empowering Surgeons

- Straightforward implantation process.
- Ready & Easy To Use (RETU).
- Jar and spatula included.
- Natural efficacy (Seamless integration with natural bone healing).
- Faster bone healing.
- Mixability with S-VETOSS granules.
- Efficiency that rivals autologous graft.
- Affordable superior bone grafting quality.
- Excellent handleability and operational peace of mind.

Technical Features

Configuration: Moldable Putty – Injectable Biocomposite with engineered bioresorption

Chemistry: Proprietary Biphasic Calcium Phosphate Bioceramics embedded in biocompatible organic binders

Architecture: Uniquely interconnected porous structure, similar to cancellous bone.

Bioceramics Granules: Dual Resorption Profile

Storage and Handling: Room temperature, ready to use, no reconstitution or preparation is required

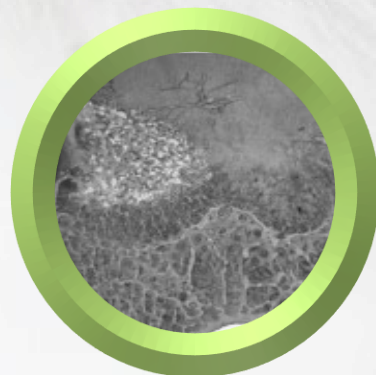

Shelf life: 5 years

SVETOSS+ is a new line of ultra-pure, innovatively engineered synthetic bone-graft material, clinically proven to be an ideal substitute for autograft.

The Bioactive Biocomposite

SVETOSS+ Is The Latest Innovation In Biomatcan's Bone-like Regeneration Product Line For Veterinarians. It is the Very First Bioceramics Bone Graft Putty of Its Kind For the Vet World.

SVETOSS+ is the result of close collaboration between Biomatcan's scientists and surgeons. Developed with proprietary SVETOSS core technology
